

# NSW Foundation Spatial Data Framework:

## Administrative Boundaries Theme

### Dataset/product title: State Electoral District

Image depicts a sample of the State Electoral District dataset © DFSI Spatial Services 2018

<b>Dataset/product description</b>	State Electoral District dataset represents current NSW or NSW Federal electoral boundaries in conjunction with the Electoral Commission, containing all of the cadastral line data or topographic data features which form, by definition, the boundaries between adjoining electorates. It is a polygon feature class within the NSW Digital Cadastral Database (DCDB).
<b>Dataset uses</b>	Land and property data underpins the economic, social and environmental fabric of NSW. It also provides a snapshot of a region in addition to providing population breakdown for the area. This may assist in planning exercises.
<b>Current status</b>	<p>The State Electoral District dataset is up to date as reflected in the current boundaries gazetted by the Australian Electoral Commission.</p> <p>Coincidence with the cadastral fabric is maintained where required and the spatial accuracy of the dataset reflects that of the cadastral fabric with relation to the boundaries as gazetted.</p>

	<p>The attributes 'create date' and 'modified date' provide information on the features' temporal accuracy. There is no overall accuracy reported in the database. Any changes that occur to the dataset should have a reference in the authority of reference feature class in the DCDB.</p>
<b>Standards and specifications</b>	<p>Metadata for the relevant Spatial Services datasets are required to comply with AS/NZS ISO 19115 ANZLIC Metadata Profile v1.1, ISO 19115-2 and ISO 19139.</p>
<b>Access and licensing</b>	<p>Spatial Services, a division of the Department of Finance, Services and Innovation (DFSI) creates and manages Intellectual Property for the Crown in right of New South Wales.</p> <p>Acquisition of this data is subject to the customer entering into an appropriate Creative Commons license agreement.</p> <p>To the extent that Creative Commons licensing applies, all data and other material produced by Spatial Services constitutes Crown copyright.</p> <p>Spatial Services has applied the <a href="#">Creative Commons Attribution 3.0 Australia Licence</a>. Spatial Services asserts the right to be attributed as author of the original material in the following manner:</p> <div data-bbox="533 1099 948 1245" data-label="Image"> <p>The image shows the Creative Commons Attribution-NonCommercial 3.0 Australia License logo. It consists of three circular icons in a row: the first contains 'CC', the second contains a person icon, and the third contains an equals sign. Below these icons, the letters 'BY' and 'NC' are displayed in a bold, sans-serif font.</p> </div> <p>© Spatial Services [date of extraction]</p> <p><b>Additional terms for the use of Spatial Services material</b></p> <p>Any derived products which are created will be required to clearly mark the date that any extractions from the Spatial Services Spatial Database occurred.</p> <p>All Intellectual Property which is owned by Spatial Services should only be loaded on any external cloud platforms if Spatial Services' Intellectual Property remains unchanged, maintained and preserved.</p>
<b>Metadata</b>	<p><a href="#">State Electoral Districts</a></p>
<b>Updates</b>	<p>The dataset is updated to reflect changes in boundaries as gazetted by the Electoral Commission of NSW.</p>
